Airlessco Rev-Tip Reversible Airless Spray Tip System

- Spray clean Rev Guard - air foil shape for a clean, no drip spray application
- Compact size - use in small areas
- Finger tight nut - no tools needed for assembly or adjustment
- Easy assembly
- Posi-loc system - Snap in centring of tip, no leaks, splashback or mess
- Seal locating handle - tip handle simplifies installing and aligning the seal
- Individually tested
- Highest quality carbide for extra long life consistent size and spray pattern
- Single seal - metal - no leaks

Tip Identification

The first three digits identify it as a Rev-Tip for airless paint spraying (Part No. 560-XXX) or a Rev-Tip for airless line striping (Part No. 562-XXXST). The fourth digit is the fan width—the number is half the fan width, e.g., 5 means a 10" fan. The fifth and sixth digits are for the orifice size and is measured in thousandths of an inch, e.g., 17 = 0.017 inch—the higher the number, the larger the tip.

No.	Description
