

# Specialty Airbrushes

**HP.BE1**

→ Iwata HP.BE airbrushes are patterned after the gravity-feed H.P.E models, but with the added feature of a bottle feed. This heavy duty, general purpose airbrush will spray a medium-to-broad pattern suitable for fabric art, posters, custom painting and other general spraying needs. The HP.BE1 works well with acrylic paints, oil paints, dyes and fabric paints. The HP.BE2 model has slightly larger nozzle, making it especially suited for working with lacquers and enamels. These airbrushes come equipped with Iwata's pre-set handle.

- Nozzle diameter: HP.BE1 - 0.6 mm  
HP.BE2 - 0.8 mm
- Bottle capacity: 40 cc
- Control: Double action main lever

**HP.BE2**

Order No.	Description
<b>HP.BE1</b>	Airbrush 0.6 mm diameter nozzle
<b>HP.BE2</b>	Airbrush 0.8 mm diameter nozzle

**H.P.E1**

→ The Iwata H.P.E is a heavy duty, general purpose airbrush. Its design is based upon the proven H.P.C model. The H.P.E is designed for easy disassembly for cleaning of its internal components when necessary. It features a removable fluid cup fastened with a taper-nut, and a removable needle cap for needle protection when not in use. Its factory suggested uses include: photo retouching, fabric art, doll painting, posters, and other artwork. The gravity feed provides immediate positive action and ease of cleaning.

- Nozzle diameter: H.P.E1 - 0.6 mm  
H.P.E2 - 0.8 mm
- Cup capacity: 40 cc
- Control: Double action main lever

Order No.	Description
<b>H.P.E1</b>	Airbrush 0.6 mm diameter nozzle for applying dye stuff
<b>H.P.E2</b>	Airbrush 0.8 mm diameter nozzle for applying lacquer
