

Airbrush Packages

NAIL.KIT1

TAN.KIT6

AUTO.KIT1

--With such a vast array of airbrushes, three compressors and a whole host of accessory items from which to choose, selecting the right combination can be confusing.

Not any more !

We have put together a range of packages to make the process a whole lot easier. Remember, just because we have called it a NAILKIT1 for example doesn't mean it won't be perfect for the home hobbyist or modeller.

Home/Hobby

→ These kits use the small lightweight IS50 Silver Jet compressor as their air source and are ideal for those who require infrequent or short period use. Linked to this is the FA.450 Pistol Grip Moisture Filter to prevent water from reaching the sprayed surface. Each kit also contains a Revolution series airbrush to complete the package.

Order No.	Description
MAKEUP.KIT1	IS50, FA.450, HP.CR
NAIL.KIT1	IS50, FA.450, HP.BR
TAN.KIT1	IS50, FA.450, HP.SAR

Salon / Professional

→ Developed with the professional airbrush artist, the serious enthusiast and the beauty industry professional in mind, these kits are for the serious user.

→ Backed by the most trusted and professional name in airbrushes, these kits use the Iwata Studio Series compressors - mightily powerful and reliable oil-less piston compressors that are remarkably quiet and extremely portable.

→ Ideal for use in:
 Beauty industry- nail technicians, airbrush tanning and make up.
 Art- commercial illustrations, wall murals
 Automotive- custom painting, auto art, murals
