

Airless Spray Tip Selection Chart

Tip Identification

The first three digits identify it as a Rev-Tip for airless paint spraying (Part No. 560-XXX) or a Rev-Tip for airless line striping (Part No. 562-XXXST). The fourth digit is the fan width—the number is half the fan width, e.g., 5 means a 10" fan. The fifth and sixth digits are for the orifice size and is measured in thousandths of an inch, e.g., 17 = 0.017 inch—the higher the number, the larger the tip.

PAINTING

Rev-Tip Fan Width (for painting 12" from surface)		Orifice Size (inches)												
mm	inches	.009	.011	.013	.015	.017	.019	.021	.023	.025	.027	.029	.031	.035
